

New features are shown in green.
Bug fixes are shown in black.

Version 2015.15.0.77

Works Orders Bug Fixes

- The convert estimate to works order when converting quote to sales order setting is now fixed.

Version 2015.15.0.76

Works Orders Bug Fixes

- Fix to the Generate Works Orders from Sales Orders screen where an error appeared when filtering that only occurred in Sage 2011.

Version 2015.15.0.75

Works Orders Bug Fixes

- Fixed an error that was thrown when viewing certain sub-assemblies on the Amend Works Order screen.

Version 2015.15.0.74

Works Orders Bug Fixes

- Fix to view item balances screen so works order popups appear in all versions of Sage.

Version 2015.15.0.73

Kitting Bug Fixes

- Another fix for the issue that occurs when building a kit on a sales order line.

Version 2015.15.0.72

Kitting Bug Fixes

- When building a Kit, if there is only one location for the finished item or components, then that will be selected, even if it is not the default location specified in settings.

Version 2015.15.0.71

Kitting Bug Fixes

- When building a kit on a sales order line, it will be allocated according to Sage SOP settings.

Distribution Bug Fixes

- Fix to allow PO tracking information to be viewed on complete purchase orders.

Version 2015.15.0.70

Works Orders Bug Fixes

- Fix to margin calculations on the budgets tab on a works order.

Version 2015.15.0.69

Distribution Bug Fixes

- Fix to landed costs that was causing some values to be doubled on the post invoice screen.

Version 2015.15.0.68

Material Planning Bug Fixes

- Works orders created from MRP will have works order numbers starting with 'WO'.

Version 2015.15.0.67

Works Orders New Features

- New filter option on the Generate Works Order from Sales Order screen.
- Select all and deselect all buttons added to the Back Flush.

Works Order Bug Fixes

- Fix to the generate works order from sales order where BOMs set to 'Use only in BOM module' were being filtered out.

Version 2015.15.0.66

Kitting Bug Fixes

- Fix to convert quote to sales order procedure to stop error being thrown.
- Select sales order on convert will only show one line per sales order.

Version 2015.15.0.65

Works Orders New Features

- New filter options on the Back Flush screen.
- Customer names appear on Amend Works Orders and Back Flush where applicable.

Works Order Bug Fixes

- Fix to the finished item screen on works orders that was causing changes to not be saved.

Version 2015.15.0.64

Works Order Bug Fixes

- SQL script fix when BOM tables are missing.

- Capacity planning no longer shows deleted works orders.

Version 2015.15.0.63

Works Order Bug Fixes

- Fixed error that was thrown when printing labels on the Amend Works Orders screen for works orders that had a batch traceable finished item.

Version 2015.15.0.62

Works Order Bug Fixes

- Fix to allow works orders without any components to be booked in.

Version 2015.15.0.61

Works Order Bug Fixes

- It's now possible to cancel issuing a traceable item at the point of selecting the serial/batch number without an error appearing forcing the user to restart Sage.

Version 2015.15.0.60

Works Order Bug Fixes

- Fix to allow booking in of the last item on a works order where the works order is part booked.

Version 2015.15.0.59

Works Order Bug Fixes

- Fix to unbooking partial quantities on works orders where the cost was not divided by the quantity correctly.

Version 2015.15.0.58

Works Order Bug Fixes

- Change the SQL script to handle missing BOMCost or BOMCostItem tables.

Version 2015.15.0.57

Distribution Bug Fixes

- Fix to flagging Purchase Order Tracking as received when receiving goods.

Kitting Bug Fixes

- Components of a Kit will show customer short name as second reference when building from a Sales Order.

Version 2015.15.0.56

Kitting Bug Fixes

- Fixed an object reference error thrown when building a Kit from the build kit menu item.

Version 2015.15.0.55

Kitting Bug Fixes

- Second reference should now always show the customer short name when a Kit is built from a Sales Order.

Version 2015.15.0.54

Material Planning Bug Fixes

- Fixed the issue where quantities were zero when stock unit had not been set in the SiStockItem table.

Version 2015.15.0.53

Manufacturing and Distribution Bug Fixes

- Rebuilt to fix report menu items.
- Code change to fix issues when running with Job Costing 15.5.0.0 and up.

Version 2015.15.0.52

Distribution Bug Fixes

- Fixed an error that was thrown when a stock item was added to a sales order using our features, and the stock item doesn't exist in the selected customer's price book.

Version 2015.15.0.51

Kitting Bug Fixes

- When converting quotes to sales orders, stock history will show the correct sales order number instead of a temporary number.

Version 2015.15.0.50

Distribution Bug Fixes

- Fixed stock shortages for non-grouped.

Version 2015.15.0.49

Material Planning Bug Fixes

- Fix to show correct results in Capacity Planning when filtering by area.

Version 2015.15.0.48

Material Planning Bug Fixes

- Fix to the export to excel function in MRP so all the values export correctly, instead of just the ones showing on screen.

Version 2015.15.0.47

Distribution Bug Fixes

- Fix to stock shortage transfers to correct quantities when using warehouse groups.
- Blank transfers no longer created when there is no stock required.

Version 2015.15.0.46

Distribution Bug Fixes

- Stock transfer shortages 'in transit' quantity no longer includes service manager transfers.

Version 2015.15.0.45

Works Order Bug Fixes

- Fix to correct the booking in process when the finished item is traceable and generates serial numbers automatically.

Version 2015.15.0.44

Distribution Bug Fixes

- Removed the code that moved the discount controls to the first tab on sales orders, as it was causing the discount to be removed when the sales order was next amended.
- Stock transfer settings corrected in Distribution settings.
- Improved the speed and functionality of the create price book screen that appears in the 'add historical lines' screen.

Works Order Bug Fixes

- The copy works order function will now copy any works order.
- Fix to the finished item screen on works orders that was causing errors when trying to change the item.

Version 2015.15.0.43

Distribution Bug Fixes

- Fix to updating stock item supplier landed costs where a 'The given argument is out of reach of valid values' error was thrown.

Version 2015.15.0.42

Distribution Bug Fixes

- Fix to telesales screen where discount was being applied twice.
- Sales order returns will now have the nominal control when project accounting is not enabled.

Version 2015.15.0.41

Distribution Bug Fixes

- Fix to templates where stock items were not being added to the sales order.

Version 2015.15.0.40

Distribution Bug Fixes

- Fixed a memory leak with the telesales popup that could cause slow-down/crashes.
- Stock Transfers created by Stock Shortages now have their address populated, resolving pick list reporting blank fields.

Material Planning Bug Fixes

- Fixed an issue caused by a conflict of works order suggestion settings that was causing no suggested works order suggestions for items below minimum stock.

Works Order Bug Fixes

- Fixed an object reference error that appeared when adding a new line to a sales order when project accounting was not enabled.

Version 2015.15.0.39

Distribution Bug Fixes

- Possible fix for the intermittent issue where duplicate/extra purchase order tracking lines are created.

Version 2015.15.0.38

Kitting Bug Fixes

- Fixed quantity needed input field on the build kit screen.

Version 2015.15.0.37

Kitting Bug Fixes

- Now able to delete sales order lines which have a kit if the kit has been completed.

Version 2015.15.0.36

Distribution Bug Fixes

- Fixed an issue where it was not possible to set a landed cost percentage value on the amend supplier screen.

Version 2015.15.0.35

Distribution Bug Fixes

- When using Distribution Mark Up Pricing, where the suppliers currency is different from that of the customers, the selling price will now be calculated correctly.
- New report added - Purchase Orders and Returns (Linked to Sales Orders).

Version 2015.15.0.34

Material Planning Bug Fixes

- Fixed an issue that caused an object reference error to be thrown when running MRP and not having a default component warehouse set in Works Order settings.

Version 2015.15.0.33

Works Order Bug Fixes

- When creating a Purchase Order from within a Works Order, the price of the items can now be amended.

Version 2015.15.0.32

Distribution Bug Fixes

- The Warehouse Replenishment Group Maintenance screen 'Add' button has been removed. Now clicking or tabbing in the grid/list will add another warehouse to the group.

Version 2015.15.0.31

Distribution Bug Fixes

- The Warehouse Replenishment Group Maintenance screen no longer throws an error when amending items and saving.
